

Best Integrated Village Development Project Award by India CSR Network

L&T Hydrocarbon Engineering (LTHE) won India CSR Network's **Best Integrated Village Development Project** award for its Environment Health Improvement Programme (EHIP) at Vasai's Medhe and Majivali villages near Mumbai. EHIP is an integrated community development initiative which has led to a positive impact on the lives of the villagers and spurred socio-economic development of the community at the two villages.

The coveted prize is both an affirmation of the success of the LTHE backed initiative as well as a timely recognition of the importance of a holistic approach to CSR and community development activities.

The India CSR Leadership Summit 2021, organized by **India CSR Network**, is one of the largest gatherings of CSR professionals in the country and saw participation from more than 5,000 leaders from Government, Business, Civil Society, and Academia this year.
